Final Terms

for

NO0013643221

FRN Entra ASA Unsecured Open Green Bond Issue 2025/2030

Oslo, 03 September 2025

Terms used herein shall be deemed to be defined as such for the purpose of the conditions set forth in the Base Prospectus clauses 2 Definitions and 13.3 Definitions, these Final Terms and the attached Bond Terms.

MIFID II product governance / Professional investors and eligible counterparties (ECPs) only target market –Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Bonds has led to the conclusion that: (i) the target market for the Bonds is eligible counterparties and professional clients only, each as defined in Directive 2014/65/EU (as amended) (MiFID II); and (ii) all channels for distribution of the Bonds to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Bonds (a distributor) should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Bonds (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

PROHIBITION OF SALES TO EEA RETAIL INVESTORS – The Bonds are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (EEA). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of Directive (EU) 2016/97 where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation (as defined below). Consequently no key information document required by Regulation (EU) No. 1286/2014 (as amended) (the PRIIPs Regulation) for offering or selling the Bonds or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Bonds or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

This document constitutes the Final Terms of the Bonds described herein pursuant to the Regulation (EU) 2017/1129 and must be read in conjunction with the Base Prospectus dated 6 December.

The Base Prospectus dated 6 December 2024 constitutes a base prospectus for the purposes of the Regulation (EU) 2017/1129 (the "Base Prospectus").

Final Terms include a summary of each Bond Issue.

These Final Terms and the Base Prospectus [and the supplement[s] to the Base Prospectus] are available on the Issuer's website <https://entra.no> or on the Issuer's visit address, Biskop Gunnerus gate 14, 0185 Oslo, Norway, or their successor (s).

1 Summary

The below summary has been prepared in accordance with the disclosure requirements in Article 7 of the Regulation (EU) 2017/1129 as of 14 June 2017.

Introduction and warning

<i>Disclosure requirement</i>	<i>Disclosure</i>
Warning	This summary should be read as introduction to the Base Prospectus. Any decision to invest in the securities should be based on consideration of the Base Prospectus as a whole by the investor. The investor could lose all or part of the invested capital. Where a claim relating to the information contained in the Base Prospectus is brought before a court, the plaintiff investor might, under the national law, have to bear the costs of translating the Base Prospectus before the legal proceedings are initiated. Civil liability attaches only to those persons who have tabled the summary including any translation thereof, but only where the summary is misleading, inaccurate or inconsistent, when read together with the other parts of the Base Prospectus, or where it does not provide, when read together with the other parts of the prospectus, key information in order to aid investors when considering whether to invest in such securities.

Key information on the Issuer

<i>Disclosure requirements</i>	<i>Disclosure</i>
<i>Who is the issuer of the securities</i>	
Domicile and legal form	The Issuer is a public limited liability company incorporated in Norway and primarily organized under the laws of Norway, including the Public Limited Companies Act. LEI-code ((legal entity identifier): 549300APU14LQKTYCH34.
Principal activities	Entra is a leading owner, manager and developer of office properties in Norway and owns and manages a large portfolio of centrally located high-quality properties in and around Oslo, and in Bergen and Stavanger. Entra has a solid customer portfolio with a high proportion of public tenants. The company's strategy is focused on delivering profitable growth, high customer satisfaction and environmental leadership. As of 30 September 2024, the management portfolio totals approximately 1.2 million square meters, of which approximately 85 per cent is in the Greater Oslo region. Entra has in addition 170,000 sqm in the project portfolio and development sites. Sustainability is an integrated part of Entra's business, and environmental leadership has been an important part of the Group's business strategy for more than 15 years. Efforts are focused on areas where Entra can have the greatest impact: • Environmental leadership is one of Entra's three strategic

	pillars, and its Net Zero Carbon strategy is set to contribute to world's carbon reduction targets whilst also focusing on the use of natural resources and circularity. - To operate Entra's business and value chain in an ethical and sustainable manner is of key strategic importance and seen as a prerequisite for its license to operate. - Growing social value, health, safety and wellbeing in the company's properties, clusters and communities is important and sensible from both a social and financial perspective. - Through investing in its culture and people, Entra continues to improve its business and competitive edge, as well as being able to seize the opportunities emerging in its business environment.

What are the key risk factors that are specific to the issuer

Most material key risk factors

Risks relating to interest rate fluctuations

Higher interest rates would affect the Group's results of operations and cash flows. The Group has a gross nominal interest-bearing debt of NOK 32.1 bn as of 30.09.24. The average remaining term for the Group's debt portfolio was 3.4 years. As at 30.09.24, 68.3 per cent of the Group's financing was hedged at a fixed interest rate with a weighted average maturity of 3.7 years. Higher interest rates could also negatively affect the valuation of the Group's assets.

Risks related to the business of the Group and the industry in which the Group operates

The value of the Group's assets is exposed to macroeconomic fluctuations. The Group's properties are all located in the largest cities in Norway, and slowdowns in the economic activity in Norway in general and these geographic areas in particular could affect the demand for office space in the cities in which the Group operates.

A lower rate of inflation or reduced consumer price index could lead to lower than anticipated rental growth for the Group's properties and consequently potentially reduce future rental income and negatively affect property

valuations.

The Group could be unable to let a vacant property or re-let a property following the expiry of a tenancy at economically attractive rates or at all. The failure by tenants of the Group to meet their obligations, or the termination of lease agreements by tenants, could result in loss of rental income, increase in bad debts and decrease in the value of the Group's properties. The 20 largest tenants as of 30.09.24 stood for approximately 48.7 per cent of the rental income. Termination of such lease contracts could thus affect the vacancy rate, results of operations and valuation of the Group's assets.

Risks related to property development

The Group is subject to development risks such as e.g. cost overruns, delays and other unforeseen events in its business of development of commercial properties. As of 30.09.24 the project portfolio consisted of four development projects with an estimated total project cost of NOK 3.2 bn of which NOK 2.1 bn was accrued, see also section 6.2. Entra normally spend between NOK 1 and 2 bn on its project portfolio each year.

The Group is dependent on the services of external construction companies and service providers in connection with the development and construction of its property projects and is thus exposed to risks if a contractor should experience financial or other difficulties.

Risks related to valuation of the Group's property portfolio

Adjustment based on changes in the fair value of the Group's properties or inaccuracies in calculations of fair value could negatively affect the Group's balance sheet and results of operations. The Property Appraisal Reports could incorrectly assess the value of the Group's properties. An incorrect valuation may affect the market value of the outstanding bond issues. A too positive valuation may result in a higher market value, while a too negative valuation may result in a lower market value. Further, a write-down of property values may affect the financial profile of the company negatively, and/or may lead to a rating downgrade from the rating agency (Moody's). A weakened credit profile may also reduce the market value of the outstanding bond issues.

Risks relating to the financial profile of the Group

There are covenants in the Group's bank loan agreements relating to the interest cover ratio and the loan-to-value of property that restrict the Group's ability to incur indebtedness above a certain level.

The Group's degree of leverage could affect its ability to obtain additional financing for working capital, capital expenditures, acquisitions, development or other general corporate purposes. The Group could require additional capital in the future in order to execute its strategy, which may not be available on favourable terms, or at all. The Group's existing or future debt arrangements could limit the Group's liquidity and flexibility in obtaining additional financing, in pursuing other business opportunities or corporate activities or the Company's ability to declare dividends to its shareholders. The Company is a holding company and is dependent upon cash flow from subsidiaries to meet its obligations and in order to pay dividends to its shareholders.

A reduction in access to finance could further weaken the company's global credit rating from Moody's, and as such the company's refinancing possibilities and ability to finance new investments. In such a situation, the company could be exposed to an increase in financing costs which would weaken the underlying result, debt service ability and dividend capacity. Greater risk aversion in the financial markets could significantly weaken investor interest for Entra's debt instruments, hereunder have a negative impact on available financing terms and/or make access to new financing less, if at all, available.

Climate risks

Regulatory changes resulting from climate related risks could cause the need for environmental investments in property, plant and equipment. Increased severity of extreme weather events such as storms and floods are a long-term risk that could cause damage to property, plant, equipment and installations and may lead to increased insurance cost and/or reduced customer satisfaction. Failure to comply and adapt to climate related matters is also a significant reputation risk which could result in e.g., lack of tenant interest, higher cost of capital in the financial market, and lack of ability to attract or retain talent.
