Oslo, 10 July 2026

Terms used herein shall be deemed to be defined as such for the purpose of the conditions set forth in the Base Prospectus clauses 2 Definitions and 13.3 Definitions, these Final Terms and the attached Bond Terms.

MIFID II product governance / Professional investors and eligible counterparties (ECPs) only target market –Solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Bonds has led to the conclusion that: (i) the target market for the Bonds is eligible counterparties and professional clients only, each as defined in Directive 2014/65/EU (as amended) (MiFID II); and (ii) all channels for distribution of the Bonds to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Bonds (a distributor) should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Bonds (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

PROHIBITION OF SALES TO EEA RETAIL INVESTORS – The Bonds are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (EEA). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; (ii) a customer within the meaning of Directive (EU) 2016/97 where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation (as defined below). Consequently no key information document required by Regulation (EU) No. 1286/2014 (as amended) (the PRIIPs Regulation) for offering or selling the Bonds or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Bonds or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

This document constitutes the Final Terms of the Bonds described herein pursuant to the Regulation (EU) 2017/1129 and must be read in conjunction with the Base Prospectus dated 20 January 2026.

The Base Prospectus dated 20 January 2026 constitutes a base prospectus for the purposes of the Regulation (EU) 2017/1129 (the "Base Prospectus").

What are the key risk factors that are specific to the issuer

Most material key risk factors

Risks relating to interest rate fluctuations

Due to the Group's considerable level of interest-bearing debt, higher interest rates would affect the Group's interest expenses, cash flows and financial flexibility negatively. The Group has a gross nominal interest-bearing debt of NOK 31.8 bn as of 30.09.25. The average remaining term for the Group's debt portfolio was 3.8 years. As of 30.09.25, 68.6 per cent of the Group's financing was hedged at a fixed interest rate with a weighted average remaining maturity of 3.4 years. While this limits the short- to medium-term impact of interest rate fluctuations on interest expenses, the Group remains exposed to interest rate risk over time, as higher market interest rates may increase financing costs when existing hedging arrangements mature or are refinanced, and may also adversely affect the valuation of the Group's assets.

Risks related to the business of the Group and the industry in which the Group operates

The value of the Group's assets is exposed to macroeconomic fluctuations. A weakening macroeconomic environment may reduce demand for office space as tenants downsize, delay expansion or reduce activity, which could lead to higher vacancy rates, downward pressure on rental levels and longer letting periods. In addition, higher interest rates or increased risk premiums may result in higher yield requirements in the property market, which could reduce the market value of the Group's office properties.

A lower rate of inflation or reduced consumer price index could lead to lower than anticipated rental growth for the Group's properties and consequently potentially reduce future rental income and negatively affect property valuations.

The Group could be unable to let a vacant property or re-let a property following the expiry of a tenancy at economically attractive rates or at all. The failure by tenants of the Group to meet their obligations, or the termination of lease agreements by tenants, could result in loss of rental income, increase in bad debts and decrease in the value of the Group's properties. The 20 largest tenants as of 30.09.25 stood for approximately 48.6 per cent of the rental income. Termination of such lease contracts could thus affect the vacancy rate, results of operations and valuation of the Group's assets.

Risks related to property development

The Group is subject to development risks such as e.g. cost overruns, delays and other unforeseen events in its business of development of commercial properties. Such risks may arise from changes in construction costs, regulatory requirements, technical challenges or market conditions, and may lead to higher capital expenditures, delayed project completion and reduced project profitability. As of 30.09.25 the project portfolio consisted of six development projects with an estimated total project cost of NOK 4.2 bn of which NOK 3.8 bn was accrued, see also section 6.2. Due to the size of these projects, adverse developments may have a negative impact on the

Group's financial position and cash flows.

The Group is dependent on the services of external construction companies and service providers in connection with the development and construction of its property projects. As a result, the Group is exposed to risks related to contractor performance, including financial distress, capacity constraints, delays, quality issues or failure to meet contractual obligations. Any such events could lead to increased costs, project delays or the need to engage alternative contractors on less favourable terms, thereby negatively affecting the Group's results of operations and financial position.

Risks relating to the financial profile of the Group

There are covenants in the Group's bank loan agreements relating to the interest cover ratio and the loan-to-value of property that restrict the Group's ability to incur indebtedness above a certain level.

The Group's degree of leverage could affect its ability to obtain additional financing for working capital, capital expenditures, acquisitions, development or other general corporate purposes. The Group could require additional capital in the future in order to execute its strategy, which may not be available on favourable terms, or at all. The Group's existing or future debt arrangements could limit the Group's liquidity and flexibility in obtaining additional financing, in pursuing other business opportunities or corporate activities or the Company's ability to declare dividends to its shareholders. The Company is a holding company and is dependent upon cash flow from subsidiaries to meet its obligations and in order to pay dividends to its shareholders.

A reduction in access to finance could further weaken the company's global credit rating from Moody's, and as such the company's refinancing possibilities and ability to finance new investments. In such a situation, the company could be exposed to an increase in financing costs which would weaken the underlying result, debt service ability and dividend capacity. Greater risk aversion in the financial markets could significantly weaken investor interest for Entra's debt instruments, hereunder have a negative impact on available financing terms and/or make access to new financing less, if at all, available.

Climate risks

Regulatory changes resulting from climate related risks could cause the need for environmental investments in property, plant and equipment. Increased severity of extreme weather events such as storms and floods are a long-term risk that could cause damage to property, plant, equipment and installations and may lead to increased insurance cost and/or reduced customer satisfaction. Failure to comply and adapt to climate related matters is also a significant reputation risk which could result in e.g., lack of tenant interest, higher cost of capital in the financial market, and lack of ability to attract or retain talent.

Most material key risks	
• Market risk is the risk that the value of the Loan will decrease due to the change in value of the market risk factors. The price of a single bond issue will fluctuate in accordance with the interest rate and credit markets in general, the market view of the credit risk of that particular bond issue, and the liquidity of this bond issue in the market. • Market value of the Bonds may be negatively affected by changes in property valuations: Changes in the fair value of Entra ASA's property portfolio may affect how investors assess the credit risk associated with the Bonds. The Group's properties are subject to periodic valuations based on assumptions regarding rental income, vacancy rates, yield requirements, interest rates and market conditions. If these assumptions prove inaccurate or market conditions deteriorate, the reported property values may change. • Such valuation changes may influence investors' perception of Entra's leverage, loan to value ratios and financial headroom, which may directly affect the pricing, liquidity and market value of the Bonds in the secondary market. In particular, downward adjustments of property values may increase perceived credit risk or raise concerns about Entra's credit profile, potentially resulting in increased price volatility or reduced market value of the Bonds. • In respect of the bonds issued as "Green Bonds" there can be no assurance that the relevant use of proceeds will be suitable for the investment criteria of an investor
